## Feed Bin Monitoring System

Accurate livestock management of feed inventory and animal consumption 24/7

- » **Real-time management** of performance, health and feed consumption of your animals
- » **Avoid running out of feed** by monitoring feed level in your feed bin
- » **Eliminate the risk** of climbing up the feed bin for manual verification of the feed level
- » **Easy** to install and use
- » **Access your data 24/7 with the FarmQuest** online service and make informed decisions
- » **Easy navigation** as easy to use as your Smartphone

# Complete **CONTROL** of your data from **ANYWHERE, 24/7**

» This system consists of a compatible **GENIUS controller** with the **FEED BIN MONITORING** option; each bin will have

- » one **GE-FBT/SB**,
- » one **GE-LIM** and
- » one **load cell** for each leg of the bin

The **GE-LIM** (lightning isolator module) protects the GENIUS controller against the effects of lightning

The **GE-FBT/SB** (feed bin transmitter) is connected to the bin load cells

The **SB-15K** (bin load cells) is installed under each leg of the bin and is designed for extreme weather conditions.

In **CONTROL**, 24/7
