

# Release Your Inner

## The New Automated Individual Sow feeding System

- » Reliable and robust
- » Quick and easy agitator disconnect
- » Detects empty feed augers
- » Extra opening to manually add feed
- » Possibility of adding a second feed line to the unit
- » Flexible Multi-directional installation of the unit façade
- » Adjustable feeder output
- » Robust industrial computer with wired or wireless option
- » Remote or direct parameter adjustment
- » Each unit is autonomous
- » Quick and visual unit status information
- » Can automatically control heat lamps

Access to your **CONTROLLER** and  
your breeding data from **ANYWHERE**  
**IN THE WORLD, 24/7**

#### Automated individual sow feeding:

- » Customization of the Feeding Curve (via FarmQuest)
- » Low consumption Alerts (smart phone, tablet) – (via FarmQuest)
- » Possibility of sequencing the daily ration into several meals (via FarmQuest)
- » Programming of an optimal feed curve for each individual sow (via FarmQuest)
- » Quick and inexpensive installation
- » Allows for direct human intervention if required
- » Lowered error risk
- » Always supplies fresh feed

- » **LOW RATE** of feed loss and feed refusal
- » Distribution adapted to a sow's individual rhythm
- » **DECREASE** of animal Stress due to:
  - » Lower human presence
  - » Open access to continuous feed
- » **Increases the quality of the life of the sows**  
**Positive increase of technical results:**
  - » Promotes increased lactation
  - » Faster growth of piglets
  - » Promotes a Quick return to the reproductive cycle
